General and Revenue Secretariat. | J&C | File No. 47 of 1935 | [App. F. III-2

3 The Director's confidential letter about the deputation of Dr Raghunath and his D.O. letter about the financial results are submitted herewith.

4 Taking the latter first, it is not correct to say that the factory has worked at a loss as it has paid its expenses depreciation and there is a small profit of Rs 1603 during the year. If all the inventories had been handed over to the Supdt, the profit would have been more. The Balance Sheet also shows that there has been no loss since the commencement but a small profit of with the second Kiln and increased output the factory will soon pay a good dividend.

5 As regards Dr Raghunath's deputation the Director is not in favour of it. Though there is room for considerable improvement Dr Raghunath has on the whole done fairly well.

6. At the Mutiny meeting it was decided that an expert plumber should be employed as early as possible and that Mr Perumal Chetty should look after the sales and accounts like leaving the technical work to Dr Raghunath. It was also decided that we need not consider any foreign deputation

Just now.

The Director has not referred to Dr Raghunath's deputation to Calcutta mentioned in the letter but he may be useful to depute Dr Raghunath for a short period to Bagalbagh, Calcutta Gulmohar & other places where there are Pottery & Porcelain works in India. He may perhaps be sent after Dr Paranjpe gets acquainted with the work of the factory.

In regard the results of working, I think the correct way will be the presentation of the figures of the Dist + actual of the Dec. Interest on working capital must be excluded as an item of revenue Expenditure but interest on fixed capital need not be so deducted. (Fixed capital may be regarded as the paid up share capital of a company). In this view the working results are a return of R4.50 on the capital of R1,50,000 for the year, i.e. 3 per cent per annum. If the fixed capital is looked upon as borrowed capital, then the Dist's presentation

+ Director asks for what is accepted for the purpose

General and Revenue Secretariat.

182 File No. 47 of 1935

[App. F. III-2

is correct. There is a loss on the year's working Rs 6830. 4. 10.

13 Regarding depositing in Rajamahal to Japan we decided the decision at the monthly meeting and the Dir was that the first thing was to get an expert from outside, and after some time Mr Rajamahal, or any other of the Mds in the factory who may be found fit the most suitable may be sent. I think this decision may be adhered to.

14 I don't think a tour to Calcutta, Jutbalpur Dayalbagh (Agra) & other places will be of much use — ~~we suppose that Mr R.~~ ~~can be absent from the factory for the period~~

Dear Mr. Venkatanaranappa,

When we met at the Dewan's Chambers on the 30th Augt. you seemed to be under the impression that the Government Porcelain Factory had made a profit. I had in mind the latest report of the working of the Factory for the month of June 1935 showing a loss of Rs 1,300/- for the month - when I said that it was not so. The Revenue accounts - for the whole year have since been received and you will notice that the working has ended in a loss of Rs 6,830/-. I enclose copies of the two reports for your information.

Yours sincerely,

Abdul Wajid.

M. Venkatanaranappa, Esq., B.A.,

D. O. No. B-CB-2/35-36

Confidential.

OFFICE OF THE DIRECTOR,

S. Abdul Wajid Esq., B.A.
Director.

Bangalore, dated.....3rd September 1935.

Dear Mr. Venkatanaranappa,

With reference to your confidential D.O. No.D.1159 dated 21st August, 1935, calling for my views as to whether it will not be in the interests of the Government Porcelain Factory to send Mr. N.V. Raghnath, the Manager of the Factory to Calcutta and also to Japan etc., I write to say that in my opinion such a deputation of Mr. Raghnath to foreign countries will not result in much good to the concern.

From my experience of him I find that he is not temperamentally suited to be in independent charge of such a Factory. He has no capacity either to organise labour or to control his subordinates. As complaints about the insulators supplied by us were frequent, I had deputed the Industrial Engineer to look into the matter and he reported that the concern was in a bad state, that the templates used in the Factory were not satisfactory and the supervision in the different sections very slack.

I have directed the Industrial Engineer to supervise the work until such time as we could get an expert, about whom I am in correspondence with our Trade Commissioner in London. The Industrial Engineer has introduced the Piece-Work System in vogue in all such institutions for the first time in the Factory. In the Daily-Wage System, it would not be possible to find the value of the work turned out and the proportion labour cost should bear to the cost of the finished article.

The only place I could think of putting Mr. Raghnath in is the Testing Laboratory. With our increased output, there may be necessity for a wholetime man to properly test our insulators.

I have said on another reference that it is much better to employ an able person having a large experience of such concerns rather than send a candidate from here for training for a year

or two. The candidate selected may not have the aptitude for the work or owing to other causes he may not fully benefit by so being deputed. He would be on our hands and we may not know what to do with him. While he is experimenting and learning the concern may suffer. But in case of an expert the choice is wider and if one is not suited we can always dispense with his services and get another.

I may mention that even under the best of conditions, no person in any of the European Factories is considered fit to be put in independent charge of the concern unless he has worked in the different sections for about ten years. We cannot afford to take chances with our Factories. I want to have the best man for them at the best price. It would be more advantageous for Mr. Raghnath to work under such an expert than under conditions which are quite different from ours. If he gives a better account of himself than he has hitherto done and shows that he has aptitude, has taken full advantage of the opportunity to qualify himself and that it would be really in the interests of the concern that his training should receive a polish by his being deputed to any of the countries that are far advanced in the industry, nothing will stand in his way then.

I may refer to another advantage. We could put two or three of our young men under the expert and select one or two of the best after a time to be sent to Japan or Germany to complete their training and eventually take the place of the expert in the Porcelain Factory when we decide upon doing away with his services.

Yours sincerely,

M. Venkatanaranappa Esq., B.A.,
Secretary to Government,
Development Department,
Bangalore.
